

## Feasibility Studies

Within the activity five feasibility studies are prepared, each of them investigating specific issue of electro-mobility in urban areas. The studies grounds to eGUTS Standards, eGUTS Local Action Plan template and Terms of Reference, DTP eMob Strategy and implementation of pilot actions. FSs are taking into consideration EU and DTP area as well as national specifics, considering global trends and including list of measures supporting realisation of e-mobility where appropriate, feeding into pilot actions several measures defined. Following feasibility studies will be developed:

**[D4.2.1 Electric charging stations development in urban areas](#)**

**[D4.2.2 Pedelects vs ecars in urban transport system](#)**

**[D4.2.3 Local and Regional eMobility Policy Support](#)**

**[D4.2.4 Electro bus involvement into public transport fleets](#)**

**[D4.2.5 DYI Conversion provides step-by-step](#)**
